Kamei Analytical Company, Inc. Kamei Analytical Company, Inc. is a Japanese and U.S. based consulting firm that provides advisory and project management services in the area of structural analysis and design. We provide structural design support for engineering staff, help clients in extending the use of their structural engineers' services, and promote the advancement of structural engineering through the development and promotion of ASCE guidelines. Our programs are centred around several key areas: Guidelines Development, Training and Education, Research, Consulting and Analytical Products. Kamei Consulting, Inc., a global organization formed from the integration of Kamei Analytical Company, Inc. and AKIHO Engineering Services Co. Ltd., provides consulting services and product support for a wide range of products used for structural analyses, design and project management. Savio Automotive, Inc. Savio Automotive, Inc. is a small, independent company located in Lenexa, Kansas. Our focus is the design and production of quality gasoline engines. We enjoy a good reputation for reliability and quality of products and we are the first engine producer in the United States to use EGR on an automobile engine. About us The company was founded on May 11, 2003 in El Segundo, CA as a robotics company with the mission to develop new innovations that will revolutionize safety and efficiency in the areas of industrial robotics and guidance, control and sensing. Recognized as one of the safest and most efficient robots in the industry, Savio's award-winning R1 robot was named the 2004 "Robot of the Year" by Robotics Magazine. And in 2005 and 2006, the R1 received the prestigious "Robot Vanguard Award" from the Robotics Industries Association. In 2009, Savio Automotive, Inc. expanded its operations by incorporating Savio Engineering. Savio Engineering offers a wide array of project engineering services for manufacturers of precision engineering instruments and automated production equipment. When it comes to automotive, the Savio four-wheel drive products used today on over 40% of the F-150's and Excursions in use today are the result of the company's small-engine research. The company's joint venture, SAI

Precision Engine Controls, is a leader in the design and development of engine control systems. Savio Automotive Savio Automotive, Inc. is a privately owned company with primary offices located in El Segundo
